Model No.:
Description:

FMR4PSLFXLBYY
Ø30.5 Metallic flush mounting series momentary illuminated Flush pushbutton

## Salient Features:

- Compact design
- Flush mounting
- Quick installation
- Safe operation
- Robust design
- Aesthetically elegant
- Available in variety of colors
- IP65 protection
- Can be used for elevator function
- All plastic raw material f1 UV stabilized as per UL746C
- HL3-R26 as per BS EN 45545-2

## General Characteristics:

It consists of one illuminated flush mounting flush actuator, suitable for Ø30.5 cutout, with Clip on metal bracket (4BRK) fitted with contact elements of FMR C... series \& one FMR clip on lamp. Refer Datasheet for FMR C1 element \& Datasheet for FMR C2 element. The actuator has IP65 as degree of protection as per IEC 60529. A minimum of one contact element \& a maximum of four clip on contact elements can be stacked on the bracket of this actuator by a simple push action.

This unit can be used with any panel, ranging from 1 mm to 3 mm thickness. The actuator is bayonet locking into the bracket. Two screws are provided with the bracket. After assembly, the lock screws are to be tightened with a torque of 1.2 Nm so that they pierce through the paint of the panel. This will ensure good earthing to the unit.

## Accessories \& codes:

## NA

## Ordering codes

The ordering code for each product is mentioned in the Catalogue/Data Sheet and not indicated on each product because of the various combinations possible it becomes practically impossible to do so, more over the actuators, lamp unit and contact element, which together make a push button, are sold separately to OEM's as well as dealers. However the primary packing box always mentions the ordering code of the material it holds.

## Mounting Instructions:

Safety regulations: This unit may be installed \& commissioned by personnel who are familiar with current regulation for health \& safety at work \& accident prevention. Ensure local regulations are met especially those relating to safety. This is for use on flat surface of type $4 \mathrm{X}, 12$ enclosure.

Ensure that this actuator will operate fully after installation. Failure to follow these will result in death or serious injury.
